¹ S1 1909, Master die doubling. “Doubling visible on the designer’s initial. Many dies show the designers initial doubled. This was created on the master die, transferred to a hub and subsequently to numerous dies. It is of slight interest to collectors, but is very common. It appears as a large L over a small L.” “The Flying Eagle & Indian Cent Attribution Guide 3rd Edition Volume 2 1878 - 1909” By Richard E. Snow <https://www.indiancent.com/>
